| Notes: | | | | | | | | | | | | | | | | | | |
| Some embedded Storage Chipsets are not natively supported by VMware. When this is the case we use a 3rd party add-on card which is supported by VMware. We have made note of which brand/type of 3rd party add-on card was used to pass the VMware certification process. | | | | | | | | | | | | | | | | | | |
